A research of the Agency of European Union for fundamental rights, presented in the Parliament in Brussels on the 8 March 2014, confirms that 33% of European women have been subject to violences. Only 1/3 of them have reported the aggression.

It's estimated that the phenomenon of the violences of gender hits at least 62 millions of European citizenship from 17 to 74 years old and cost about 223 billions Euros in Europe.

At this link you can find information and inherent diagrams about the diffusion of the problem of Violences against the women, and most of the consequences the abuses cause to victims.
